

KEY REPORTS FOR SMALL AND MEDIUM-SIZED ENTERPRISES

1. Executive Dashboard (High-Level Overview)

Benefit: This dashboard provides a high-level snapshot of the company's overall financial health, offering a quick and comprehensive view of key financial metrics. It aggregates essential data points into a single, easily digestible interface.

Outcome: By presenting a concise overview of financial health, the Executive Dashboard enables executives to make informed strategic decisions, prioritize initiatives, and steer the company towards its goals. It helps in quickly assessing whether the company is on track to meet its financial objectives or if there are areas that need attention.

Applicability: This dashboard is suitable for companies of all sizes and industries, providing a universal tool for executives to monitor overall performance. It is ideal for C-level executives and senior management teams who need a broad view of the company's financial status.

Possible Charts: The dashboard might include numeric widgets for Key Financial Metrics such as Total Revenue and Net Profit, a Revenue vs. Expenses Line Chart to track financial performance over time, a Pie Chart showing the Top 5 Customers by revenue, and a Cash Position Numeric Widget to display the current cash balance.

2. CFO Dashboard (Financial Performance)

Benefit: The CFO Dashboard offers in-depth financial insights tailored for strategic financial management and decision-making. It provides detailed analyses of financial performance to aid in managing the company's financial health and planning future financial strategies.

Outcome: This dashboard helps CFOs and financial managers identify financial trends, optimize performance, and set realistic financial goals. It supports high-level financial planning and strategy development by providing detailed financial data and performance metrics.

Applicability: Most beneficial for medium to large companies across various industries where in-depth financial analysis and strategic planning are crucial. It is designed for CFOs, finance directors, and senior financial analysts who require detailed financial data and insights.

Possible Charts: It includes a Financial Overview Numeric Widget for metrics like Profit Margins and Revenue Growth, a Revenue vs. Operating Margin Line Chart for performance comparison, a Cash Flow Analysis Bar Chart showing cash flow trends, and a CAGR Calculation Numeric Widget for measuring compound annual growth rate.

3. Profit & Loss Dashboard

Benefit: The Profit & Loss Dashboard offers a detailed view of the company's profitability by comparing total income against expenses and analyzing profit margins. It helps in understanding the financial outcomes of business operations.

Outcome: This dashboard identifies profitable areas and potential cost-cutting opportunities, providing insights into the company's financial performance. It aids in financial planning and helps managers make decisions to enhance profitability.

Applicability: Essential for companies of all sizes and industries as it provides a fundamental view of financial performance. It is useful for accountants, financial managers, and business owners who need to monitor profitability and manage expenses.

Possible Charts: It includes a Total Income vs. Total Expenses Bar Chart to display overall profitability, a Net Profit Numeric Widget for profitability figures, a Profit & Loss by Department Stacked Bar Chart to break down profit and loss across departments, and a Profit Margin Gauge Chart to track profit margins.

4. Balance Sheet Dashboard

Benefit: The Balance Sheet Dashboard offers a snapshot of the company's financial position at a specific point in time, showing the balance between assets, liabilities, and equity.

Outcome: It aids in assessing the company's financial health, solvency, and stability. This dashboard is crucial for understanding the company's financial position and for making investment or loan decisions.

Applicability: Crucial for all companies, especially those seeking investment, loans, or needing to report their financial status to stakeholders. It is valuable for accountants, financial analysts, and investment professionals.

Possible Charts: The dashboard features an Assets vs. Liabilities Bar Chart for a visual comparison of assets and liabilities, an Equity Numeric Widget for the equity position, an Asset Distribution Pie Chart for asset allocation, and a Liability Breakdown Stacked Bar Chart for analyzing different types of liabilities.

5. Cash Management Dashboard

Benefit: The Cash Management Dashboard provides insights into the company's liquidity, cash flow, and cash position. It helps in managing working capital and ensuring sufficient cash flow for operations.

Outcome: It assists in cash flow forecasting, improving working capital management, and ensuring that the company has enough cash for operational needs and financial obligations.

Applicability: Critical for small to medium-sized businesses and startups where

managing cash flow is essential for day-to-day operations. It is useful for financial managers, accountants, and business owners who need to monitor and manage cash flow.

Possible Charts: It includes a Cash Flow Trend Line Chart to show cash flow patterns over time, a Cash Flow Forecast Line Chart for future cash flow projections, a Daily Cash Balance Bar Chart for tracking daily cash positions, and a Payment Method Distribution Pie Chart for analyzing how payments are received.

6. Sales Performance Dashboard

Benefit: The Sales Performance Dashboard provides insights into sales trends, customer behavior, and product performance. It helps in identifying successful products and customers and optimizing sales strategies.

Outcome: It supports sales strategy development by identifying trends, top performers, and areas for improvement. This dashboard is essential for improving sales performance and driving revenue growth.

Applicability: Valuable for companies in retail, e-commerce, and B2B sales where tracking sales trends and customer behavior is important. It is designed for sales managers, business development teams, and marketing professionals.

Possible Charts: The dashboard features a Monthly Revenue Numeric Widget for sales figures, a Sales Trend by Product Stacked Area Chart to show product performance over time, an Average Invoice Value Gauge Chart for tracking average sales values, and a Top Selling Products Bar Chart to highlight top products.

7. Accounts Receivable Dashboard

Benefit: The Accounts Receivable Dashboard provides visibility into outstanding customer payments and accounts receivable processes. It helps in improving cash flow by managing overdue payments and optimizing collection efforts.

Outcome: It supports effective accounts receivable management by identifying late payments, tracking payment history, and optimizing collection strategies.

Applicability: Important for B2B companies and those offering credit terms where managing customer payments is a key part of financial operations. It is useful for accounts receivable managers, credit controllers, and financial analysts.

Possible Charts: It includes an Accounts Receivable Aging Bar Chart to show overdue invoices by age, an Outstanding Invoices Table for a detailed list of unpaid invoices, a Customer Payment History Bar Chart for tracking payment patterns, and a Days Sales Outstanding (DSO) Trend Line Chart to monitor receivables efficiency.

8. Accounts Payable Dashboard

Benefit: The Accounts Payable Dashboard provides insights into the company's payment obligations and accounts payable processes. It helps in managing cash outflows, ensuring timely payments, and maintaining vendor relationships.

Outcome: It supports effective accounts payable management by tracking outstanding invoices, due dates, and vendor payments. This dashboard helps in optimizing cash flow and managing supplier relationships.

Applicability: Crucial for companies with significant supplier networks or complex supply chains. It is designed for accounts payable managers, procurement teams, and financial controllers.

Possible Charts: It features an Outstanding Invoices Table for a detailed list of payables, a Payment Due Dates Calendar View for tracking payment schedules, a Vendor Payment History Bar Chart for analyzing payment patterns, and a Days Payable Outstanding (DPO) Trend Line Chart to monitor payment efficiency.

9. Inventory Management Dashboard

Benefit: The Inventory Management Dashboard provides visibility into stock levels, product performance, and inventory trends. It helps in optimizing inventory management, reducing stockouts, and identifying slow-moving items.

Outcome: It supports effective inventory management by tracking stock levels, product turnover, and alerting for low stock situations. This dashboard is essential for maintaining optimal inventory levels and improving inventory efficiency.

Applicability: Essential for retail, manufacturing, and distribution companies where inventory management is a core function. It is useful for inventory managers, supply chain professionals, and operations managers.

Possible Charts: It includes an Inventory Status Stacked Bar Chart for current stock levels, a Top Selling Products Bar Chart for analyzing product performance, a Product Turnover Rate Heat Map for tracking turnover rates, and a Low Stock Alert Table for monitoring inventory levels.

10. Tax Management Dashboard

Benefit: The Tax Management Dashboard offers insights into tax liabilities, compliance, and potential savings. It helps in managing tax obligations and identifying opportunities for tax optimization.

Outcome: It supports effective tax management by tracking tax liabilities, upcoming payments, and potential exemptions. This dashboard is essential for ensuring tax compliance and optimizing tax strategies.

Applicability: Important for all companies, especially those operating in multiple tax

jurisdictions. It is designed for tax managers, accountants, and finance professionals responsible for tax compliance and planning.

Possible Charts: It features a Tax Collection by Rate Donut Chart for visualizing tax collection distribution, a Monthly Tax Liability Line Chart for tracking tax obligations, a Tax Exemption Impact Bar Chart for analyzing exemption effects, and an Upcoming Tax Payments Table for scheduling future tax payments.

11. Forecast vs. Actual Dashboard

Benefit: The Forecast vs. Actual Dashboard compares actual performance against forecasts, providing insights into forecasting accuracy and performance discrepancies.

Outcome: It helps in refining forecasting methods, improving accuracy, and identifying areas of over or underperformance. This dashboard supports better financial planning and adjustment of future forecasts.

Applicability: Valuable for companies of all sizes that engage in financial planning and forecasting. It is useful for financial planners, analysts, and executives involved in financial strategy and performance review.

Possible Charts: It includes an Actual vs. Forecast Revenue Line Chart for comparing revenue forecasts with actual performance, an Actual vs. Forecast Expenses Bar Chart for tracking expense forecasts versus actuals, and a Variance Analysis Table for detailed comparison of forecast vs. actual figures.
